

CO2 PERFORMANCE 2023

TARGET SCOPE 1 AND 2

Filoform wants to reduce its CO2 emissions by 93% in 2024 versus 2015.

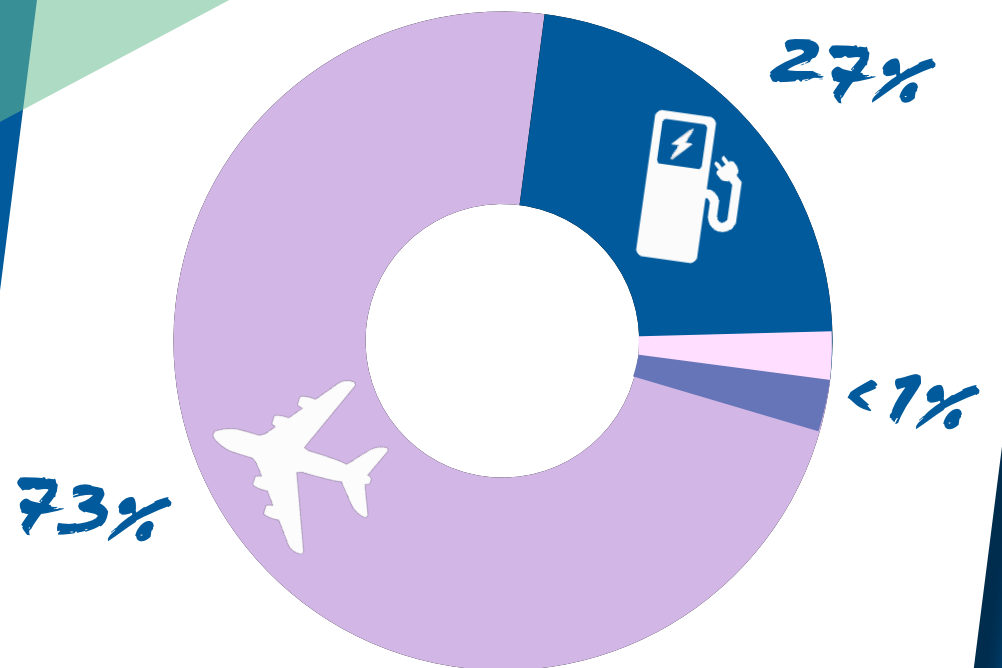

Do you want to know how we got there? Visit www.filoform.com/CSR

TARGET SCOPE 3

Filoform wants to reduce the CO2 emissions in its chain by 25% in 2025 versus 2020.

Remarkable!

In 2023, the emissions of upstream transport raised 19x versus the emissions in 2022. This is caused by a more detailed analysis of the data. With this new dataset, we can see where reduction is most effective!

Progress in scope 1 en 2

Filoform has 25,1 ton CO2 emissions in 2023, 85% less than 2015.

Do you have an idea for Filoform to reduce even more CO2 emissions? Send our Sustainability Coordinator an email, or call us at +31 88 998 1242

Progress scope 3

The chain of supply of Filoform had 5,376.7 ton CO2 emissions. This is 24% lower than 2021.

When referring to 2020, the emissions are 12% higher, but 5% lower than 2022! In 2024 we will continue to work on the chain analysis to reduce even more.
