

Hot air gun

Installation of heat shrink components Suitable for use under heavy conditions and in narrow spaces

Features

- Independent from gas- or power sources
- Due to the special jet nozzle, the flame will continue to burn even outside and with strong wind
- Easy operation even single handed is guaranteed due to the piezo ignition system
- The protective spiral avoids skin contact with the hot jet nozzle
- The gas refill cartridges are easy to replace without danger of leaking gas
- capacity is sufficient for approximately 2 hours use
- Temperature adjustable from 150°C till 750°C
- Operation possible at temperatures from tot -8°C due to butane-propane
- The hot air gun can be used in every angle without disturbance of the flame
- TÜV-approval on the hot air gun and the refill cartridges

Specifications

Totaalgewicht pistool + patroon	620 gram
Instelbare temperatuur	150°C tot 750°C
Ontsteking	Piëzo (automatisch)
Minimale verwerkingstemp.	-8°C
Gaspatroonvulling	Butaan-propaan
Keurmerk	TÜV

Products

Art.nr.	Product Name	Order unit
86000	Hot air gun with cartridge	per piece
86010	Cartridge	12 pcs/carton
