

Branch-off seal universal

The Filoform Branch-off seal is used in taped resin joints with branch-off configurations. The branch-off seal is a polyether molded product, which seals the space between the main cable and the branch-off cable, allowing de-airation of the joint. The innovative design ensures efficiency combined with minimal material wastage.

Features

- Suitable for all usual branch joints
- Produced without any waste of materials
- Open-cell structure for a perfect venting of the cable joint
- Blocks the liquid resin
