

# Insulated piercing connector

Suitable for making a safe connection of live cables without stripping the insulation from the conductor. The connector is completely safe to touch during the installation.

The connector can be installed without stripping the conductors. Independent assembly thanks to the plastic shear bolt. The insulated connector is safe in use.

## Features

- Insulated housing
- Provided with a wall in the middle of the connector
- Installation without stripping the conductors
- Thermoplastic shear bolt
- Piercing technology

## Specifications

- Plastic insulation: Polypropylene
- Plastic part of shear bolts: Polypropylene
- Metal connector housing: Brass or Aluminum tinned extrusion (depending on type)
- Metal part of shear bolts: Copper, tinned
- Piercing contacts: Brass, tinned
- Standards: IEC61238-1 (class to be determined)
- Other: Dielectric properties: > 10 kV / mm.
- Recyclable: yes
