

Insulated branch-off piercing connector 1-16mm²

Suitable for branch-off of paper and plastic-insulated conductors. For use in cast resin joints or taped resin injection joints

The connector can be installed without stripping the conductors. Independent assembly thanks to the plastic shear bolt. The insulated connector is safe in use.

Features

- Insulated housing
- Installation without stripping the conductors
- Tinned contact blades
- Thermoplastic shear bolt
- Anodized mounting screw
