

Mastic tape

For longitudinal watertight sealing of taped resin injection joints
For use on heat shrink cable joints
For fixing artificial grass
Watertight gasket in glass and steel constructions

Features

- Both the cloth carrier and the butyl rubber have excellent resistance to water
- Because of good weather resistance properties, mastic tape can be applied outdoors
- Is easily applied to any shape and has excellent adhesion properties to both rough and smooth surfaces
- Convenient process due to cloth carrier
- Does not wear out. Apply with a regular thickness
- UV-resistant, no degradation of polycarbonate and silicone

Specifications

Film type	Synthetic fibre
Material 2-sided	Self-fusing butyl rubber
Total thickness	1,0mm
Tensile strength (100mm/min)	> 40 N/cm
